

Empathy Map

Date	10 JUNE 2026
Team ID	XXXXXX
Project Name	Voice-Based Concept Understanding Analyser (VBCUA)
Maximum Marks	4 Marks

Empathy Map Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution

SAYS	THINKS
"Grading 60 spoken student submissions takes hours, and I'm worried my feedback gets inconsistent by the end." "I wish I could measure delivery features like awkward pauses and filler words without relistening three times." "We need an objective	- Is manual audio evaluation scalable for large classrooms? - A student might sound confident but completely miss the core technical keywords and semantic correctness. - How can AI be utilized as a gradingassistant without

benchmark for oral technical exams."		entirely replacing human academic judgment?
	PERSONA NAME Educator / Academic Evaluator	
DOES • • Spends hours manually evaluating recorded student conceptual updates and audio test assignments. • Attempts to take notes simultaneously on speech fluency (fillers, silence) and factual definition accuracy. • Generates physical or digital evaluation tables and hand-written		FEELS • Overwhelmed by the time required to review multiple audio files sequentially. • Anxious about maintaining strict, unbiased consistency across different student presentations. • Motivated to provide deep, actionable feedback metrics to help students bridge

feedback
